Rhynlandt Bulb Nurseries
Valkenburg near Leiden, Holland

WE GUARANTEE

We guarantee our stock to be true to name. No better bulbs can be bought at any price. If any customer should receive stock which, when it comes to bloom, proves not true to name, it is the result of an accident and in such a case we will send the customer stock of the variety ordered in the grade of stock sent out in the first instance. He may keep the bulbs first received.

Promptly upon receipt of the bulbs the package and each individual bag within it should be opened so as to give the air access to the bulbs. A disregard of this may impair their blooming power.

All bulbs we send out will grow and bloom under any ordinary conditions. But we have no control over conditions surrounding the bulbs and the care they receive after they pass out of our hands. We therefore cannot assume responsibility for customer's failure to succeed with them, either on account of unfavorable weather or soil conditions, improper planting, neglect, moles or mice.

Superlative Bulbs

WE HAVE always taken especial pride in claiming superlative quality for our bulbs.

In the first place they are superlative in size, hence produce superlative flowers.

But that does not tell the whole story. In order to be superlative, a bulb has to produce the flower as described in our catalogue. The flower has to be of the correct color, shape, and the one outstanding point in connection with Tulips especially—it has to be of lasting quality. Poor bulbs produce poor flowers which do not last. For years we have called Zandbergen Bulbs

“Bulbs in a Class All Their Own”

Will you give us a chance to prove our case? We know that there are no finer bulbs produced anywhere than those grown on our farms in Holland. Unless we can deliver bulbs of the highest possible excellence we do not ship them. Let our catalog prove that Zandbergen Bulbs are not only very reasonable in price, but that the bulbs will do exactly as we promise.

Daffodils at "Tulipdom"

NARCISSI or DAFFODILS

The terms Narcissus and Daffodil are interchangeable, although there exists a tendency to apply the term Narcissi to the small-flowering groups like Poeticus, Leedsii, Barrii and Incomparabilis; while the larger-flowered Trumpet varieties are most frequently referred to as Daffodils.

Soil and its Treatment. Narcissi will thrive in any ordinary garden soil, but prefer a deep, rather moist, sandy loam. When the soil is of a dry and sandy nature, it should be deeply dug, if possible at least a season before planting the bulbs, composted leaves or well-rotted horse manure being added and a vegetable or annual crop grown on the ground. Before the bulbs are planted a sprinkling of lime should be spread on the surface and then raked in. It is also beneficial to add bone meal at the rate of $1\frac{1}{2}$ oz. to the square yard while digging the soil. **Never** use fresh manure of any kind at planting time—it burns the roots! On very poor and dry sandy soils we recommend the addition of about 1 oz. per square yard of sulphate of potash to be sprinkled over the surface of the ground, after planting.

Naturalizing in Grass, etc. All Narcissi will grow equally well in the open or in partial shade. In the flower-border, to obtain the best effect, they should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Narcissi should always appear in the hardy flower border, where they can be planted between the clumps of herbaceous plants, which hide as well as shelter the foliage later in the season.

OUR BULBS PROVE THEIR QUALITIES

We offer **only** finest quality Double Nosed Extra Selected bulbs true to name and nothing else! We guarantee that every one hundred bulbs will produce from 200 to 300 flowers, depending on the variety. Please consider this factor when comparing prices.

Note: Adhering to the method in which we now arrange Tulips, we also present the Daffodils in the logical order of their respective merits. Thus the variety which in our opinion is the choicest in its respective class, leads that class, the second best coming second, etc. The number given after each variety name indicates the relative time of flowering.

TRUMPET NARCISSI

Trumpet or crown as long as or longer than the perianth segments.

CLASS A. YELLOW

Diotima. (3). Considered by many as the very best of the new yellow trumpets; a beautifully proportioned flower of huge size gracefully carried on a tall, tapering stem. Broad overlapping petals of medium deep primrose and a more deeply colored trumpet. **\$4 each.**

Lord Wellington. (3). Without question the largest and most beautiful daffodil ever introduced. Both trumpet and perianth are rich golden yellow in color. The flowers are enormous in size, extraordinarily well formed and of good substance. The tall stems and broad foliage compare well with the exceptionally large flowers. An exquisite and a distinct novelty. **\$2 each, \$22 per dozen.**

King Alfred. (1). Considered one of the best among the yellow trumpets on account of its earliness, tall strong stem and long lasting quality. An enormous golden yellow flower of distinctly refined shape and deeply frilled trumpet elegantly recurved at mouth. One of the earliest and most valuable for forcing and the garden, and destined to remain at the head of this class for a long time to come. **\$2 per dozen, \$15 per 100.**

Specially prepared for early forcing. **\$2.75 per dozen, \$20 per 100.**

Robert Sydenham. (2). The trumpet is a beautiful golden yellow of immense size, heavily frilled and glittering as though sprinkled with gold dust. The perianth is a soft, sulphur-yellow of exceptional symmetry. Both length of stem and quality of foliage cause this variety to be of outstanding beauty. **\$3.50 per dozen, \$25 per 100.**

Tresserve. (3). A huge flower with a slightly campanulate canary-yellow perianth and a very bold rich yellow trumpet, with large open mouth deeply flanked at brim. A very robust and free-flowering variety, producing flowers of large size; splendid exhibition variety. **\$2.00 per dozen, \$15 per 100.**

The First. (1). A sulphur-yellow trumpet with perianth of the same color, which ultimately will replace the old, popular Emperor. It blooms much earlier, is a very robust grower and bears its large beautiful flowers on very tall, strong stems. One of the first to bloom. **\$2.00 per dozen, \$15 per 100.** Specially prepared for early forcing. **\$2.75 per dozen, \$20 per 100.**

Olympia. (3). Handsomely waved or twisted perianth of a pure primrose-yellow in artistic contrast with a huge straight trumpet of a slightly deeper shade. Rim of trumpet frilled. **\$2.00 per dozen, \$15 per 100.**

CLASS B. WHITE OR ALMOST WHITE

Varieties with white or pale primrose trumpet and white perianth.

A most unusual and charming variety and a worthy addition to any collection. **\$4 each.**

White or Almost White Trumpet Narcissi, Concluded.

Mrs. Ernst H. Krelage. (3). Has been described by connoisseurs as "the finest among the best ivory white Daffodils." The flowers are of distinctive shape with elegantly disposed petals and creamy white trumpet. Height, 18 inches. **\$2.75 per dozen, \$20 per 100.**

CLASS C. BICOLOR

Varieties with white or whitish perianth and a yellow or primrose trumpet.

Madam Van Waveren. (2). This gorgeous variety is in a class with Lord Wellington with regard to both size and shape. The trumpet is deep golden yellow with perianth of broad massive petals. One of the finest among the bicolor trumpets and still very scarce. **\$2.00 each, \$20 per dozen.**

Van Waveren's Giant. (2). Though one of the oldest among giant bicolors, it is a leader still. Primrose perianth, bright yellow trumpet of immense size and substance. Edge of trumpet slightly frilled and artistically recurved. **\$2.75 per dozen, \$20 per 100.**

Glory of Sassenheim. (3). Large showy flowers, broad, well overlapping creamy white perianth and bright canary-yellow trumpet, well-expanded at the mouth. Good forcer and fine for the border. **\$1.50 per dozen, \$10 per 100.**

Spring Glory. (2). Three characteristics cause this variety to be a remarkable acquisition:—It is of refined shape, great size and is delightfully fragrant. It blooms early and lasts well, both outdoors and after cutting. Pure white perianth with deep golden yellow trumpet. **\$1.70 per dozen, \$12 per 100.**

Empress. (3). Perianth white, trumpet rich yellow. One of the oldest and best-known Bicolors. **\$1.50 per dozen, \$10 per 100.**

Victoria. (3). Bold erect flower, with creamy white perianth and rich yellow trumpet. Not recommended for outdoor planting, but especially fine for forcing. **\$1.70 per dozen, \$12 per 100.**

Bulb Planting Don'ts. It is just as important to know what not to do as it is to know how to do it. For instance, do not plant bulbs while the soil is too wet. If after digging you pick up a handful of soil and it crumbles easily through your fingers, well and good. If the soil forms a ball when being squeezed, it is too wet. Soil dug when too wet bakes and becomes hard, forming anything but a congenial bed for bulbs. Most planters set bulbs too deep. Read the cultural directions under the various chapter headings. Where planting 4 inches deep is suggested, bear in mind that that means 4 inches of soil measuring from the bottom of the trench. Too shallow planting is just as dangerous as planting too deep.

Naturalized Narcissi. Does your garden look like this?

BARRII NARCISSI

SHORT-CUPPED DAFFODILS

Cup or crown measuring less than one third the length of the perianth segments.

Seraglio. (3). A most distinguished and strikingly beautiful flower of great substance carried on a tall, strong stem; considered one of the largest and most outstanding among the Barrii type. The well overlapping, creamy white perianth holds forth a well-proportioned cup of deep orange. A vigorous grower and splendid for exhibition purposes. **\$6 each.**

Firetail. (3). This variety is becoming more popular the world over; broad petaled, creamy white perianth and large orange cup with scarlet-orange frill; delighting in partial shade as the cup is liable to fade in full sunshine. **\$3.50 per dozen, \$25 per 100.**

Lady Diana Manners. (3). Broad, pure white perianth with a large fluted yellow cup frilled blood-red. Very free flowering and an excellent forcer. Highly recommended for exhibition purposes. **\$1.00 each, \$10 per dozen.**

Red Guard. (2). Sulphur orange perianth with glowing orange scarlet cup. The orange hue extends through the petals, making this the fore-runner of a new artistic coloring of Narcissi. It is one of the most dainty and often produces two flowers on a single stem. **\$2 each.**

Expectation. (3). An exquisite variety equally decorative grown in pots or in the garden. The large spreading, pure white perianth is of great substance. The cup is pure yellow with orange-red margin artistically fluted and frilled. A grand exhibition variety measuring nearly 4 inches across. **\$3.50 per dozen, \$25 per 100.**

Barrii Narcissi, Concluded.

- Sparkler.** (4). Its strong, robust constitution causes it to be one of the finest in its class. Large glistening flowers, 3 inches in diameter, are supported by strong, tall stems. The color combination is exquisite—rich yellow perianth, fiery orange-scarlet crown, shaded gold. One of the best for late forcing and cutting. **\$1 each, \$10 per dozen.**
- Lady Moore.** (3). A showy variety, easily grown, easily forced, yet very substantial and hence of lasting quality. Perianth delicate creamy white, bright orange edged, citron-yellow cup of wide expansion. Altogether a strikingly beautiful variety. **\$3.50 per dozen, \$25 per 100.**
- Bath Flame.** (2). Deep yellow perianth with deeply edged orange-red cup. Extra long petals give the flower a distinct beauty and outstanding character. Because the flowers are apt to fade quickly, this variety should be planted in partially shaded situations. **\$2.00 per dozen, \$15 per 100.**
- Brilliancy.** (3). A huge flower for a Barrii, the deep golden yellow perianth measuring 5 inches across when well grown. Yellow cup edged deep scarlet. Easily forced. **\$2.35 per dozen, \$17.50 per 100.**
- Red Beacon.** (3). Ivory-white perianth combines with an intense fiery orange cup to make this one of the most showy varieties in its class. Cup has beautifully frilled edge. A striking beauty in the border, an outstanding attraction in vases in the house. **\$1.50 per dozen, \$10 per 100.**
- Red Chief.** (3). An admiration-commanding flower with pure white perianth and somewhat flattened yellow crown having a fiery orange margin with handsomely frilled edge. Truly a leader! **\$1.50 per dozen, \$10 per 100.**
- Fire-Brand.** (3). Perianth creamy white, shaded lemon at the base, cup intense fiery red. Especially recommended for shady places. **\$1.50 per dozen, \$10 per 100.**

INCOMPARABILIS NARCISSI

LARGE CHALICE-CUPPED DAFFODILS

Cup or crown measuring from one-third to nearly equal the length of the perianth segments.

- Fortune.** (1). Broad creamy-yellow perianth of very solid texture, crown of great size and elegant form opening at mouth and of a wonderful glowing soft orange color. Of perfect form, a good grower and early as it opens about the same time as King Alfred. At the Holland flower show this variety was selected as the finest Incomp. variety in existence. **\$15 each.**
- John Evelyn.** (3). A truly great novelty destined to become more popular as stocks increase. The creamy white overlapping perianth holds an exceedingly artistic apricot-orange cup prettily fluted at base and frilled at margin or edge. Flowers of great substance and of the highest standard for exhibition. Will remain an acquisition for years to come. **\$10 per dozen, \$75 per 100.**
- Orange Glow.** (4). One of the largest of the Incomparabilis Narcissi, measuring normally 4 inches in diameter. A golden yellow with a deep orange cup beautifully frilled, which does not fade so readily in full sun. **\$2 each.**
- Scarlet Lancer.** (3). One of the most pleasing and refined Narcissi. Pure white perianth and fiery orange-red cup which keeps its color in full sunshine. A wonderful decorative flower of great merit. **\$1.50 each.**

Will Scarlet.

Incomparabilis Narcissi, Continued.

Dorine. (3). Notes made in our trial-grounds last season call this variety "a real aristocrat among the red-cupped novelties." It surely is one of the finest and most refined, with its slightly overlapping creamy yellow perianth that has as its crowning glory a large, dark orange cup. Free flowering, substantial, altogether unique! **\$4.00 each.**

Red Cross. (4). A sensational novelty acclaimed a wonder by all who visited "Tulipdom" at Daffodil time. Broad, overlapping, creamy yellow perianth; large wide cup of orange-red color. Great in the garden, greater as a cut flower. **\$1.50 each, \$15 per dozen.**

Helios. (1). Creamy yellow, star shaped perianth, with slightly frilled, pale orange cup, which fades to a lovely deep yellow after flowers are open for a few days. Valuable for both the border and for early forcing. **\$3.50 per dozen, \$25 per 100.**

Croesus. (3). In our opinion the leader among medium-priced varieties in this class. A beautiful combination of a thick petaled primrose perianth and a handsome deep orange-red cup. Magnificent flower of great substance, whether forced or grown outdoors. **\$2.00 per dozen, \$15 per 100.**

Lucinius. (3). Here is a flower of perfect shape and very lasting qualities, which combination makes it a great garden and exhibition variety. Clear, deep yellow perianth of star shape, broad, well-shaped cup of orange-yellow. **\$2.75 per dozen, \$20 per 100.**

Oyster Bay, L.I. New York

Incomparabilis Narcissi, Concluded.

Bernardino. (3). A symphony of creamy white perianth, pale yellow, heavily frilled cup and the "frills" in this case bring orange-apricot shades—a combination to delight the heart of color-sensitive flower lovers. **\$1.50 per dozen, \$10 per 100.**

Gertie Millar. (3). A remarkably beautiful and exceptionally well-proportioned Daffodil; the perianth is pure white with deeply frilled cup of soft primrose. **\$2.00 each.**

These "Poets" Narcissi all have snowy white perianth segments or petals, and a flattened eye or crown, yellow or lemon, edged more or less deeply with scarlet or crimson, and sometimes mostly all scarlet. All are more or less sweetly scented. Having very highly colored crowns they should be cut young.

Glory of Lisse. (4). Pure white, orange center. Similar to Ornatus, but much larger and earlier. **\$1.00 per dozen, \$7 per 100.**

Texas. (3). One of the finest double Daffodils; tall, of fine form and a late bloomer. The color is pale yellow interspersed with brilliant orange. **\$3.50 each.**

Mary Copland. (3). The most striking and exquisite variety of the semi-double type; unsurpassed for garden or show purpose. The longer petals of pure creamy white are interspersed with shorter petals of lemon and brilliant orange. **\$2.50 each.**

JONQUIL NARCISSI

Very much prized for their delightfully scented flowers, perfectly hardy in gardens or naturalized, also well adapted to indoor culture in pots. The Jonquils are a distinctive type of the Narcissus family.

Giganteus. (2). Unquestionably the outstanding leader in this class. It has no equal when it comes to size, perfume or vigor of foliage. It is an exceedingly fine, fragrant flower for cutting, with clusters of impressive size. A dozen make quite an impressive showing, and for this reason it should ultimately become a great favorite for cut flower purposes. Easily and readily forced. **\$1.70 per dozen, \$12 per 100.**

TULIPS

We are tempted to pronounce Tulips the most spectacular of all spring flowers for a great variety of reasons. In the first place they bring us a blaze of colors when the heart is just about starved through the drab and dreary winter months.

Their range of colors is perfectly amazing, from clear white to deepest purple and maroon, including many superb vari-colored combinations. By a judicious selection of early, midseason and late varieties, Tulips may be enjoyed for the best part of six weeks outdoors, with an additional two months added when the gardener goes in for "forcing" suitable sorts indoors.

Culture. Tulips should not be grown in soil in which they have been growing for two years previously. They do best in fresh soil or in beds in which the soil has been changed. Growing them in the same soil for more than 2 years will at last lead to failure.

Do not use fresh stable manure at planting time, as it is injurious to the roots. Well-rotted manure will prove beneficial. Bone meal or dried sheep manure also can be used, about three handfuls to the square yard. This must be thrown on top of the soil before planting.

Nearly all Tulips should be planted outside about 5 inches deep, and 6 inches apart according to the size of the bulb. They should be planted four to six weeks before severe frost sets in. For best results, do not mulch them until after the soil has become frozen, to keep out mice, etc. Do not mulch them too heavily, half an inch will prove quite enough. Old cow manure, peat moss, salt hay or leaves may be used for this purpose.

PERSONAL OPINIONS.

Were we permitted to have it our way we would no longer offer a good many so-called "old fashioned" favorites. They are obsolete! Many quite reasonably priced newer varieties are far ahead of them in every respect. We do not offer novelties of questionable merit. Once you see a variety offered in our catalogue you can be sure that it deserves your consideration and trial.

How Many Bulbs to Order for Beds of a Specific Size

Below we give the number of bulbs needed to plant a circular bed of dimensions as stated. Plant outside rows first, and place three inches from edge of bed. It is advisable to plant the outer rows more closely than those toward the center.

Diameter of bed	6 in. apart	8 in. apart	12 in. apart	Diameter of bed	6 in. apart	8 in. apart	12 in. apart
3 feet	28	16	7	12 feet	452	255	113
4 feet	48	27	12	13 feet	528	299	132
5 feet	80	44	20	14 feet	612	347	153
6 feet	112	64	28	15 feet	704	398	176
7 feet	152	87	38	16 feet	804	453	201
8 feet	200	113	50	17 feet	904	511	226
9 feet	256	143	64	18 feet	1016	573	254
10 feet	320	177	80	19 feet	1132	638	283
11 feet	380	214	95	20 feet	1256	707	314

To arrive at the number of bulbs required for an oval bed, add the length and breadth and divide by two using the result as the diameter in above table. A bed 6 feet wide by 8 feet long will require the same number of bulbs as a round bed 7 feet in diameter. ($6 + 8 = 14$; divided by 2 gives 7.)

DARWIN TULIPS

The chief characteristics of the Darwins are the perfect cup-shape of the flowers, fleshy substantial petals, tall stems and bright colors, ranging through all the shades of pink and red to purple. There are certain slaty blues and blue-violets which might almost be called a blue, while the black Tulip is nearly realized in some of the dark maroon varieties. There are comparatively few white or pure yellow varieties.

Most Darwins can be forced by middle of February, many of them even earlier, provided that they are potted as soon as received.

The bulbs must be set farther apart than is the case with the early Tulips, and plenty of room on the benches must be given when vigorous growth begins. They should be grown slowly under a moderate temperature. Too high a temperature should constantly be avoided, or poor flowers result.

Nearly all varieties but especially the mauve-colored ones, lose their true color, becoming much paler when forced.

Please Note Particularly:

Giving the right varieties "the right of way" over others with less pronounced characteristics constitutes, perhaps, the most noteworthy feature of this catalogue. We have felt for some time that an alphabetical arrangement of varieties is merely a survival of a conventional form of presentation. All varieties we offer in all classes have certain merits or we would not offer them. *But some have greater merits than others, often regardless of price, and these varieties we feature at the head of their respective classes.*

An asterisk (*) preceding the name indicates that it may be successfully forced. The figure following indicates the relative time of flowering.

IS GARDEN ECONOMY STILL IN FORCE?

For years and years we have preached "QUALITY." Quality bulbs cannot be produced at low cost. While we do not charge any more for Tulips and Narcissi than any house of high commercial standing, yet we feel that in order to encourage the planting of more bulbs in connection with beautiful gardens, we should consider the featuring of "trade size" bulbs.

These bulbs are slightly smaller than those we call our "cream quality" and which we have always called

"Bulbs in a Class all Their Own"

However, we can offer you "trade size" bulbs at 15% less than the prices quoted in this catalogue.

These bulbs will produce flowers true to name and description in the catalogue, but the flowers will be slightly smaller than those that you will secure from the larger bulbs. Nevertheless you will not be disappointed in any way with the results that you will secure from trade size bulbs.

In order to secure trade size bulbs we should hear from you not later than August 10th. After that we can only accept orders for our top quality bulbs at regular prices quoted in this catalogue.

BREEDER TULIPS

Breeders, formerly listed among the Cottage Tulips, form a distinct class by themselves, being "unbroken" forms of the old time "Florist" Tulips.

Discarded by their originators, the old Dutch gardeners, because they had no stripes nor feathers, they were more or less neglected and grown only in some obscure corners, until a taste for the so-called "art colors" awakened, and with the revival for the taste for bronze, brown and buff tones, the attention was drawn to these Tulips, which have now become the most popular late Tulips.

And they deserve their popularity. Not only for their peculiar and odd colors, but also for their great lasting qualities. In size and height they frequently surpass even the finest Darwins.

Out-of-doors or when used for forcing, Breeders require the same cultural treatment as the Darwin Tulips.

COTTAGE TULIPS

We venture to say that this type is of great antiquity, having probably originated in Persia where some species resembling them in shape are found growing wild today—*Tulipa Clusiana* among them. As far back as 1554 the Austrian Ambassador to the court of the Calif brought with him some of their seeds and Tulips became a fascinating hobby with many wealthy Viennese gardeners—for the seeds, as well as bulbs, were expensive.

The term "Cottage" Tulips is of quite recent origin. The fact that they are probably the longest lived and most lasting of all Tulips caused many of them to be planted around the country houses and cottages of England and France.

All colors imaginable can be found among them, and most of them have long stems, some of them gracefully drooping. They form an excellent cut-flower material and are unsurpassed for garden decoration. Flower lovers who happen to be in the neighborhood of Oyster Bay in May and call on us, will see one of the largest collections of May-flowering Tulips in the world.

WHITE

Vesta. (3). Pale primrose when opening, turning to pure white when in full bloom. As already mentioned, this fits in with the Darwins, for outside, as there is not a satisfactory white Darwin at a reasonable price. One of the truly great pure white May-flowering Tulips. It is equally well adapted for bedding and cutting. The large, well-shaped flowers are carried by strong upright stems. Height, 28 inches. **\$1 per dozen, \$7 per 100.**

***Carrara.** (3). Another snow-white glistening beauty which is greatly enhanced by prominent yellow stamens. The flowers are large, with broad, round petals of pronounced substance, hence the flowers last a long time. The best white for forcing. Height, 20 inches. **\$1.25 per dozen, \$9 per 100.**

***Miss Blanche.** (2). Not a new variety, but one that through sheer merit has won a high place in the hearts of lovers of pure white Tulips. The large, well-formed flowers are carried on strong upright stems. It is a splendid bedder. Height, 20 inches. **95 cts. per dozen, \$6.50 per 100.**

WHITE, EDGED PINK

***Pride of Inglescombe.** (3). White, edged carmine-rose, which color suffuses the whole flower as it ages. Of the same type as Picotee, but slightly darker and much more impressive. Height 23 inches. **95 cts. per dozen, \$6.50 per 100.**

Innovation. (3). Yellowish white, tipped and feathered soft carmine, with a very fine blue base. Large flower of beautiful shape. Height, 20 inches. **90 cts. per dozen, \$6 per 100.**

PINK AND ROSE SHADES

Wampum. (4). About as large a sort as comes in the Cottage type, and a flower of regal appearance in the garden where it gives the effect of a bright glowing rose, slightly tinted with fawn. The base of the cup is primrose with a blue halo, and the inside coloring is at least two shades deeper than the outside, which produces a very rich bright effect. Amber stripes inside at center. This very large Tulip blooms late and is long lasting. Height, 27 inches. **\$2.60 per dozen, \$20 per 100.**

An asterisk (*) stands for extra forcing qualities.

PARROT TULIPS

When still in bud the flower looks somewhat like the head of a parrot; hence the name. They can be forced slowly by the middle or end of February, but for that purpose only strong bulbs must be used. They are shy bloomers.

Gadelan. (3). Not since the introduction of Fantasy has a Parrot Tulip created such a sensation as Gadelan. We like to compare it to that rare orchid known as Cattleya. Measuring 6 to 7 inches across when fully developed, it presents a blending of blues and violets with emerald-

green blotches and white edges. Inside of flowers holds bright violet-purples with white center and contrasting black anthers. Grown alongside of Fantasy it presents a sight

never to be forgotten. Unlike other Parrot Tulips the huge flowers are supported by sturdy stems, holding them erect and well above the foliage. Height, 20 inches. **\$3 each, \$30 per dozen.**

***Fantasy.** (3). The best of all pink Parrot Tulips. A sport from the well-known Darwin Tulip Clara Butt, with a strong erect stem and flowers simultaneously with Clara Butt. VARIOUS WILD TULIPS (TULIPA)

The wild or botanical species of Tulips are of particular usefulness for rockeries. They bring bright colors very early in the season and most have graceful recurving petals. Most of them are natives of Asia Minor and other parts of Asia.

Greigi. One of the most beautiful of the wild Tulips. Enormously large flower of vivid orange-scarlet hue, with distinctly showing black center. SINGLE EARLY TULIPS

Just as the Daffodils pass out of the garden picture, these early Tulips enter, to help prolong Spring joys. This group holds, perhaps, some of the gayest colored of all Tulips

Most early Tulips grow readily in pots or pans indoors. All furnish excellent material for beds.

WHITE

***White Hawk.** (2). A superb bedding variety and one of the finest for growing in pots or pans—forcing. The flowers are pure white, of great substance and unusual grace and beauty, due to the crinkled edges of the petals. Height, 13 inches. **95 cts. per dozen, \$6.50 per 100.**

MIXTURE

Single Early Tulips, selected Bulbs, all Colors. 65 cts. per dozen, \$4.50 per 100.

WHEN SHOWING TULIPS

Care must be taken that a Tulip is entered in its own class, for instance a Breeder or Cottage Tulip listed in the Darwin class will cause it to be disqualified at the Show. For correct classification consult our catalog. It can be depended upon.

DOUBLE EARLY TULIPS

Although not so elegant in form as the single varieties, they are an exceedingly useful and beautiful class of Tulips, producing a brilliant and striking effect, when planted in beds. The flowers are more substantial and last over a long period. Nearly all of them are admirably adapted for forcing and make a fine display when grown in pots or pans; but they should be forced slowly.

For cultural directions see Single Early Tulips.

*Hyacinths are among
the most fragrant flow-
ers that grow.*

HYACINTHS

In Beds or Borders

Hyacinths should be planted 4 inches deep from the crown of the bulb to the surface of the soil or less, according to size, and about 6 inches apart or more, according to the number of bulbs available for a given space.

The soil should be made moderately firm. After planting, the beds must be mulched over with litter, as a protection against severe weather. All varieties listed are suitable for forcing and outside planting.

For outdoor beds or borders first-size bulbs produce flowers less top-heavy than those from Exhibition bulbs.

CULTURE IN POTS

The pots for all Bulbs should be well drained, the soil made moderately firm, and a little sharp sand dusted under the base of each bulb; then add more soil until one third of the bulb appears above the surface.

Hyacinths, Continued.

CULTURE IN POTS, Continued

After potting the bulbs, the pans may be plunged into a coldframe or in a sheltered spot in the garden. They should be covered with several inches of soil and, before severe frost sets in, they should be mulched heavily with leaves or straw.

Keep the pans in a dark cool spot until the buds extend sufficiently above the bulb. After the flowers are plainly visible they should be kept in a slightly cooler temperature to promote sturdy growth of the plants. The flowers should not be exposed to strong sunlight at any time, or else they are apt to fade. For indoor culture plant exhibition size bulbs of named varieties only.

EXHIBITION HYACINTHS

Selected bulbs of the highest quality, bound to produce the best results for Exhibition. Also recommended where extra large spikes are wanted in the garden.

ROSE SHADES

Favorite. (4). This variety is placed at the top of the list, and it certainly deserves this distinction. The compact flowers are extraordinarily broad with long, elegantly shaped bells; most beautiful of form and of a distinct rose coloring. For the garden a better rose cannot be imagined and it is one of the latest to bloom. Forces about the beginning of February and is as completely satisfactory for forcing as for the garden. **\$10 per dozen, \$80 per 100.**

Princess Margaretha. (3). The very large truss is compactly set with well-formed bells of soft pink. It is an excellent forcer for middle or late season and splendid for the garden. **\$6.50 per dozen, \$50 per 100.**

Rosea Magna. (2). One of the finest Hyacinths of recent introduction and a distinct improvement. The fine broad truss is set with very large bells of a beautiful deep rose color. Especially recommended for exhibition purposes because of its size and unusual forcing qualities. **\$3.50 per dozen, \$25 per 100.**

First size Bulbs of the Single Hyacinths in any of the foregoing varieties can be supplied at 25 per cent less than the prices quoted for Exhibition Bulbs.

Second Size Hyacinths (17-18 cm.)

These bulbs, one grade smaller in circumference than the second size Hyacinths, can be furnished at 45 per cent less than the prices quoted for Exhibition Bulbs.

Miniature Hyacinths (13-15 cm.)

The fifth size, commonly known as Miniature Hyacinths, are unusually handsome for growing in pots. They are a little later than the Romans, but the flowers are much stronger and the bells are much larger.

Miniature Hyacinths will be furnished in any variety of the preceding list at 60 per cent less than the prices quoted for Exhibition Bulbs.

Our extra-selected bulbs of French Roman Hyacinths bloom readily for everybody.

French Roman Hyacinths

Exceedingly popular and invaluable for winter flowering in the house, and also extensively used for Christmas forcing for cut flowers. Not suitable for outdoor planting as these bulbs are not hardy.

White Romans. Extra selected bulbs. \$1.95 per dozen, \$15 per 100.

Why Order Early? We generally have some bulbs on hand here at Oyster Bay at planting time, but both number of varieties and quantity of bulbs will be limited. The fancier whose heart is "set" on specific varieties, should order at once, surely not later than August 10th. This will insure getting just the kinds wanted, in a bulb product second to none in the world!

CROCUSES (SPRING FLOWERING)

The Crocus has its home on the shores of the Mediterranean Sea and eastward into Asia. The name crocus is of Greek origin and means saffron. Saffron in turn is the English spelling of the Arabic word "Zafaran."

In early times the orange-yellow stigmas were dried and used in medicine and are still used to-day for cooking by the Persians and Spaniards who mix them with their rice. In Greece and Rome, saffron was used as a perfume and as a yellow dye and is still employed extensively for that purpose in certain sections of the old world. Commercial plantings of crocus for the manufacture of saffron are still to be found in Persia, Spain, France and Sicily.

The Crocus is one of the loveliest of all spring-flowering plants. Soon after the snowdrops have put in their appearance come the crocuses with their large showy blooms in yellow, white, purple and stripes of lilac on a white ground. They must be grown in a more or less sunny place, otherwise the blooms do not open up fully.

They are easily forced in a temperature of about 50 degrees, especially the top-sized quality bulbs which we offer.

Please bear in mind that many so-called "first quality" Crocus bulbs do not belong in the top-size. Extra quality is never in abundance.

We guarantee all Crocus bulbs offered to be strictly top size unless mentioned otherwise.

EREMURUS

A noble group of hardy plants which is just finding its way into the American gardens from the Himalayas. The enormous, stately flower stalks, often six to ten feet tall, rise majestically from a tuft of long narrow leaves and are crowned by flower spikes two to three feet long. These spikes are composed of hundreds of closely set star-like flowers of beautiful shades of rose, yellow, bronze and white.

Eremurus should be planted in the early Fall, four inches deep. They enjoy a well-drained rich soil and a sunny location, and may be left undisturbed for years.

Although perfectly hardy they should have a heavy mulch of salt hay or leaves the first year after planting. When fully established a mulch of old cow manure is sufficient.

When flowering time is over, the plant disappears entirely, but reappears very early in the Spring, when it is advisable to place a paper bag or flower pot over the young crown to protect it from late frost.

Bungei. Golden yellow flowers borne on spikes 5 to 6 feet high. Very beautiful.
\$3.50 each. \$35 per dozen.

Elwesianus. Pink flowers thickly set in enormous spikes. Very vigorous. Blooms the beginning of June. Height, 10 to 12 feet. **\$3.50 each. \$35 per dozen.**

Shelford. The exterior of the coppery yellow flowers is tinted ruddy bronze. The flower spikes are three feet in length and closely set as in Bungei. A beautiful hybrid of noble and rich coloring. Blooms just after Warei. Height, 6 to 7 feet. **\$3.50 each, \$35 per dozen.**

Warei. Myriads of fine coppery pink flowers shot with bronze cover the three-foot flower spikes. A grand, rare hybrid of rich coloring and tall stature. Flowers just before the Bungei. Height, 6 to 8 feet. **\$3.50 each, \$35 per dozen.**

Seedlings. We offer a wide selection of Robustus, Bungei and Elwesianus seedlings, which are certain to produce a wide range of fine form and novel coloring. **\$2.50 each, \$25 per dozen.**

Above prices are based on extra heavy roots which are guaranteed to bloom the first year after planting.

Strong good flowering roots of any of the above mentioned varieties or seedlings will be furnished at a discount of 25% from prices quoted above.

DUTCH IRIS

Their exquisite shades, ease of culture, and great dependability cause these to become increasingly popular from year to year. They are thoroughly at home in sandy soil, although they will do well in any soil that is not too heavy.

In color they range from the purest white to golden yellow and bronze, from heliotrope to light blue and to the darkest blues. Because of dainty form and having strong, wiry stems, they lend themselves particularly for artistic and decorative arrangements. In the garden they should be massed, grouping the different colors by themselves.

They readily force in moderate temperature. Outdoors they should not be planted in the same place in succession, new ground each year producing by far the best flowers.

David Bless. One of the earliest varieties, and readily forced as early as March. Most unusual flower, bound to attract attention. Standards of a pale pearly blue, with blue or heliotrope falls. **\$1.15 per dozen, \$8 per 100.**

Hart Nibrig. A lovely variety blooming early and yet bearing flowers of excellent size. The falls are brilliant clear blue, while the standards are of a somewhat deeper shade. **\$1.15 per dozen, \$8 per 100.**

HARDY LILIES

Many of the late flowering Lily bulbs are not ready before the end of November. Where the ground is liable to freeze, we advise the preparation of the Lily beds or borders early in autumn, covering them with four to six inches of leaves or other litter to prevent the ground freezing until the bulbs arrive.

See that they have a well-drained position, and without exception they prefer a half shady, moist position, protected against the hot sun.

The ground must be thoroughly spaded to a depth of 18 inches before planting Lilies and must be enriched by adding equal portions of leafmould, peat and rotten manure.

Plant the bulbs 6-8 inches deep, varieties like *Speciosum* require at least 8 inches, putting some sand under and around the bulbs to insure proper drainage.

Cover the beds with six or eight inches of leaves or other litter which must be removed in late Spring.

LILIUM AURATUM

The Gold-banded Lily of Japan. Flowers white, with a wide band of gold running through the center of each petal, and thickly studded with crimson spots. Bulbs 11 to 13 inches in circumference. **65 cts. each, \$6.50 per dozen, \$50 per 100.**

Lilium regale—a true Queen.

LILIUM TESTACEUM

One of the very finest Lilies. When well established it rears its lovely dull apricot flowers six to seven feet above the ground. In habit of growth and the arrangement of its foliage around the stem it resembles *L. candidum* or the Madonna Lily in connection with which it creates lovely pictures. The drooping flowers have reflexed petals, and, being horizontally poised cause the entire plant to be most graceful. It prefers the same soils and situations as the Madonna Lily and should be treated the same.

Season of flowering June-July. Fall planting only.

DIELYTRA

Spectabilis. Better known as Bleeding Heart. This delightful old favorite is assuming a new degree of popularity. Because of its forcing qualities, it makes a splendid potted plant for the window, blooming in either greenhouse or conservatory, but it is also an excellent plant for the hardy border, and especially valuable for shady situations. It bears long racemes of heart-shaped pink flowers and blooms as persistently as any hardy perennial flower we know. In addition it has extremely graceful foliage. Whether you intend to plant it indoors or use it in your hardy border, here is one plant that we can conscientiously recommend. Not very particular as to soil. varies in color from light blue to deep ultramarine-blue and pinkish to lavender shades. Some are single, others semi-double and double, while many of them have centers or "bees" of contrasting colors. The habit of growth is most vigorous. The individual florets closely encircle the spikes and are of extraordinary size—generally two inches and larger in diameter.

We only have a very limited amount for sale and until we obtain a better title shall offer it as The Silver Dollar Strain because individual flowers on spikes frequently measure as large as a silver dollar across.

Price per package, postpaid, \$2.

Should you fail to secure a reasonable number of thrifty seedlings we will replace the seeds another season Free of Charge!

The Practical Magno Garden Marker

*Easy to read at a distance, rustproof,
waterproof, sturdy, practical, durable*

This new garden marker derives its name from the fact that its glass top enlarges the lettering on the name card more than twice its actual size. This makes it "easy to read" at a distance. No more stooping when the Magno Marker is used in your flower or vegetable garden.

The Magno Garden Marker was designed by a real garden enthusiast and it is considered by authorities as the best marker on the market. There is no other like it. It is 12½" long, rustproof, sturdy and durable. The head is in green enamel.

Price: \$3.25 per dozen, \$25 per 100.

Is Your Bulb Garden The Moles' Happy Hunting Ground?

Every year scores of our customers write to us wondering what they can do to rid their grounds of moles. It is a case of getting rid of them or being deprived of one of the greatest pleasures on earth—that of having a fine Tulip garden.

The same problem has bothered us in our Nurseries in Holland, and was not solved satisfactorily until a preparation was compounded that did the work. We call it "Mole-kill" for short. It is a powder which is very effective, so effective in fact that if it does not do its work your money will be refunded.

"Mole-kill" is not dangerous to animals (dogs or cats) which may happen to eat a poisoned mole. Keep the product in a safe spot and out of the reach of children. The handling and manipulation are free from danger. "Mole-kill" has caused thousands of congratulatory letters to be received by its inventor, both from experiment stations and from private gardeners. One bottle is sufficient for destroying at least a hundred moles, and is fit for use for six months after opening the bottle.

Directions for Using Mole-kill

Choose by preference where the runs branch off. Carefully uncover the run and free it of earth. Take a worm of average length, shorten it at both ends by about a quarter of an inch, wipe away the first drop of blood, touch each end of the worm with the powder, a small quantity of which has been carefully poured on some paper so as not to dirty the contents of the bottle, slip the worm thus prepared into the run and close the hole with earth. When your garden has thus been baited, tamp all runs down with the foot or rake. If on the following day, there are fresh molehills, the bait must be applied a second time; moles rarely travel alone. Keep at it, planting the bait until molehills cease to appear. **Price, postpaid, \$3.**
